

Dear Parent or Guardian,

Your child is now eligible for Medicaid benefits and can receive **EPSDT services** (Early and Periodic Screening, Diagnostic, and Treatment). These services are **free** for all Medicaid members from birth until the month of their 21st birthday.

### **What services are included?**

EPSDT covers routine and preventive care to help your child grow up healthy. This includes:

- Well-child checkups and physical exams
- Vision and hearing tests
- Dental checkups and cleanings (starting at age one)
- Mental health care
- Lab tests
- Lead testing
- Health education
- Immunizations

### **Why are these checkups important?**

Regular checkups help make sure children and teens are growing and developing well. They also allow your child's doctor to catch any health concerns early and provide treatment.

### **What if my child needs extra care?**

If your child's doctor decides they need special tests or treatments, even if Medicaid does not usually cover those services, they can still be covered if the care is considered medically necessary. For services not usually covered, your child's doctor can request approval. Families in managed care plans should contact their plan directly for help.

### **Need help or have questions?**

Call the Utah County Health Department at **801-851-7033**. You may receive a call from the Utah County Health Department to confirm your child's most recent wellness visit.
